

DIRECTORS' REPORT

Dear members,

Your Directors hereby present un-audited financial statements of your Company for the first quarter ended 31 December 2006 as required by the Companies Ordinance, 1984.

The current Crushing Season commenced from 25 November 2006 and during the first 60 days' operation your Mills crushed 180,699 tons of sugarcane and produced 13,234 tons sugar with an average recovery of 7.48% compared with 118,112 tons of sugarcane crushing and 9,283 tons sugar production with 7.13% recovery in 75 days of the corresponding period of the last year. Sugarcane supply to the Mills, except for the initial one week, remained smooth and consistent which has reflected in 91% increase in the average daily crushing over the same period of last season. In view of relatively higher sugarcane production estimates for the current crushing season, sugarcane supply is expected to remain consistent during most part of the season. However, lifting of sugarcane from our Mills area by the neighbouring mills has started showing adverse results in the form of relatively higher procurement cost of sugarcane. The sugarcane crop has again been hit by frost in our region and has started reflecting in fall in sucrose contents of cane which had already remained low due to massive propagation of low yielding "Richman" variety (SPF238) of sugarcane in this area.

The new milling unit is already in operation but enhanced capacity of the sugar mills is expected to start contributing towards sugar production soon as minor teething problems of the plant during the trial run are being overcome and new units of enhanced facility are gradually coming on line.

The Distillery Plant produced 3.439 million litres of both industrial and fuel grade alcohol during the quarter under review compared with 1.515 million litres produced during the corresponding period of last year. The capacity utilisation of the distillery plant remained restricted due to lack of interest in the international market for both Anhydrous and Industrial grade Ethanol and sharp fall in the price not correspondingly reflected in the cost of raw material. The production and sales targets will be reviewed after considering domestic and international market conditions for both anhydrous and hydrous ethyl alcohol which are expected to improve in the second and third quarters of the year.

The financial results for the quarter under review showed negative trend as they represent only one month's sugar mills operation. The situation is likely to improve during the remaining part of the year and the Management hopes to achieve positive operating results of the Company, Insha Allah.

For and on behalf of the Board

Manzoor Hayat Noon

Chairman & Chief Executive
